Machine Learning Engineer Resume

Name: Abhishek

Email: your.email@example.com

Phone: +1234567890

LinkedIn: linkedin.com/in/yourprofile

GitHub: github.com/yourusername

Summary:

Machine Learning Engineer with experience in developing and deploying ML models for real-world applicat

Skilled in Python, TensorFlow, Scikit-Learn, and data analysis. Passionate about building AI-driven solution

and optimizing performance.

Skills:

- Programming: Python, C++

- Machine Learning: Supervised & Unsupervised Learning, Deep Learning, NLP

- Frameworks: TensorFlow, PyTorch, Scikit-learn

- Data Analysis: Pandas, NumPy, Matplotlib

- Databases: SQL, MongoDB

- Deployment: Flask, FastAPI, Docker

- Tools: Git, Jupyter Notebook, VS Code, PyCharm

Work Experience:

Machine Learning Intern - [Company Name]

MM/YYYY - MM/YYYY

- Developed a sentiment analysis model with 90% accuracy using NLP techniques.

- Implemented a recommender system using collaborative filtering and matrix factorization.

- Optimized model performance by hyperparameter tuning and feature selection.

Education:

Bachelors in Computer Science / Data Science

[Your University], [Year of Graduation]

Relevant Coursework: Machine Learning, Data Science, Statistics, Deep Learning

Certifications:

- Machine Learning by Andrew Ng - Coursera

- TensorFlow Developer Certificate

- Deep Learning Specialization - Coursera

Projects:

Resume Skills Matcher

- Built a Flask-based web application that extracts and matches skills from resumes.

- Implemented TF-IDF and Named Entity Recognition for skill extraction.

Lunar Lander Reinforcement Learning

- Developed a Deep Q-Network (DQN) to solve the OpenAI Gym Lunar Lander environment.

- Achieved high landing success rates using reward engineering.

Languages: English, [Other Language]
